

英文自我介绍（雷显秋）

用途：推免 / 夏令营 / 预推免面试开场

语速参考：1 分钟版约 150 词，2 分钟版约 300 词，按每分钟 140-150 词的语速朗读

湖南大学官方英文名是 Hunan University (HNU)（见学校英文官网），不是 University of Hunan

其他学校面试时，把文中的 Hunan University 换成对应校名即可

一、1 分钟版（首选，绝大多数场合够用）

Good morning, professors. It's a great honor to be here.

My name is Lei Xianqiu. I'm a third-year undergraduate majoring in Computer Science and Technology at China University of Mining and Technology.

My GPA is 4.42 out of 5, and I rank 21st among 191 students. I also got full marks in Advanced Mathematics and the Data Structures Lab.

My main research experience is an undergraduate innovation project on intelligent diagnosis of chronic fundus diseases, in which I am the principal investigator. I reproduced and adapted deep learning models for diabetic retinopathy grading and microaneurysm segmentation, building on the VisionFM ophthalmic foundation model with PyTorch.

I also received an Honorable Mention in the Mathematical Contest in Modeling and a provincial second prize in the Lanqiao Cup.

I'm strongly interested in deep learning, medical image analysis, and trustworthy AI, and I hope to pursue my master's degree at Hunan University.

Thank you.

中文对照

各位老师上午好，很荣幸能够参加这次面试。

我叫雷显秋，是中国矿业大学计算机科学与技术专业的本科生。

我的 GPA 是 4.42/5，专业排名 21/191，高等数学和数据结构实验都是满分。

我的主要科研经历是一个关于慢性眼底病变智能诊断的大学生创新项目，我担任第一负责人。我复现并适配了用于糖尿病视网膜病变分级和微动脉瘤分割的深度学习模型，基于 VisionFM 眼科基础模型，用 PyTorch 完成训练与评估。

我还获得过美国大学生数学建模竞赛 H 奖和蓝桥杯省赛二等奖。

我对深度学习、医学图像分析和可信人工智能有浓厚兴趣，希望能在湖南大学攻读硕士学位。

谢谢。

二、2 分钟版（老师明确说“详细介绍一下”时用）

Good morning, professors. It's a great honor to have this interview with you.

My name is Lei Xianqiu. I'm a third-year undergraduate majoring in Computer Science and Technology at China University of Mining and Technology.

Academically, my GPA is 4.42 out of 5, and I rank 21st among 191 students, with a weighted average score of 94.32 out of 100. I got full marks in both Advanced Mathematics and the Data Structures Lab, which gave me a solid foundation in mathematics and systematic training for research.

My main research experience is an undergraduate innovation project titled "Intelligent Diagnosis System for Chronic Fundus Diseases Based on Deep Learning," in which I serve as the principal investigator. Diabetic retinopathy is a leading cause of blindness, and screening is limited by the shortage of ophthalmologists. My work focuses on diabetic retinopathy grading and lesion segmentation. I reproduced and adapted deep learning models based on the VisionFM ophthalmic foundation model, and I implemented microaneurysm detection with a multi-scale segmentation network, using PyTorch for training, evaluation, and visualization. I also helped design the model-inference workflow of a prototype clinical platform, where we introduced a large language model to interpret the diagnostic results. This taught me that research should go beyond benchmark numbers and also consider interpretability and clinical usability.

I also developed my ability to abstract real-world problems through mathematical modeling. In the Mathematical Contest in Modeling, we studied a mixed elimination mechanism that combines judge scores and audience votes. Since the real votes were unobservable, we modeled audience support as a latent variable and used Bayesian inversion with historical records. I was responsible for modeling, implementation, and paper writing. I used MCMC with Plackett-Luce and Bradley-Terry models to estimate audience preferences. Our paper received an Honorable Mention.

My research interests are deep learning, computer vision, medical image analysis, and trustworthy AI. I hope to pursue my master's degree at Hunan University, where I can strengthen my theoretical foundation and take part in research that is effective, reliable, and interpretable.

Thank you for your time.

三、替换末尾句（按场合微调）

- 湖大默认版（已写入上文）：I hope to pursue my master's degree at Hunan University.
- 更贴方向一点：Hunan University has a strong group in AI for Science, which matches my interest in medical image analysis and reliable machine learning. I would be glad to continue my research here.
- 强调读博意愿：If research continues to help me grow, I'm also willing to pursue a PhD.
- 换其他学校时：把 Hunan University 换成目标学校官方英文名即可。

四、发音和背诵提示

容易读错的词：diabetic retinopathy（视网膜病变）、microaneurysm（微动脉瘤）、ophthalmic（眼科的）、latent variable（隐变量）、trustworthy（可信的）、Honorable Mention（荣誉提名）、Hunan University（湖南大学，读作 /'hu:næn/）。

停顿位置：每说完一个要点停一拍，尤其是 GPA 那句和项目那句之间，让老师有时间跟上。

不要在自我介绍里塞满信息。老师手上已经有你的简历，自我介绍的作用是给出一个清晰的框架，引导他们往你想被问的地方提问。

五、可能被追问的点（提前准备）

自我介绍里每句话都可能成为提问入口，以下是最危险的四句：

- 1. “principal investigator” — 追问你在团队里具体做了什么、怎么分工、其他人做了什么
- 2. “VisionFM ophthalmic foundation model” — 追问这个模型的结构、预训练方式、你为什么选它
- 3. “microaneurysm segmentation” — 追问为什么这个病灶难分割、你用了什么方法、效果如何
- 4. “trustworthy AI” — 追问你理解的可信 AI 包含哪些维度，别只说“可解释性”一个词

另外，2021 年有考生被明确追问“你负责算法设计还是写代码、这个项目你写代码了吗”，所以 2 分钟版里“using PyTorch for training, evaluation, and visualization”这句背后要有具体的代码细节支撑，不能停留在概念层面。

六、本次语法与用词修改说明

原文问题	修改后
ranking 21st... 挂在 GPA 后， 修饰关系含糊	改成 and I rank 21st...
Data Structure Labs were both full marks 不合语法（课程不能“是满分”）	改成 I got full marks in ...
student innovation project 略生硬	改成 undergraduate innovation project

原文问题	修改后
where I'm the principal investigator	改成更稳妥的 in which I am...
problem-abstracting ability 中式英语	改成 ability to abstract real-world problems
model-invocation workflow 偏生造	改成 model-inference workflow
segmentation-to-classification network 易误解	改成 multi-scale segmentation network
列表缺少牛津逗号，口语里也更清楚	补上 A, B, and C
